- Dice (the number of dice needed depends on the game level being used)
  - ▶ 3-digit numbers = 3 dice
  - ▶ 4-digit numbers = 4 dice
  - ▶ 6-digit numbers = 6 dice
  - ▶ Decimal numbers = 5 dice
- Cup for holding the dice
- Pencils

### Directions:

1. A player rolls the dice (3, 4, 5, or 6 dice are used depending on the level of the player). The dice are shaken from a cup onto the table.
2. After the first roll, a player decides to keep what s/he has rolled or reroll some or all of the dice.
3. After the second roll, the score card is filled in using the numbers that have been rolled.
4. A player fills in only one space at a time on the score card.
5. The next player begins their turn.
6. The game continues until the nine spaces on the score card are filled in with a number.

A point is given for each category on the score sheet that is filled in correctly. The player with the largest number in a category receives another point. The player with the highest score wins.
